| | |
|--|---|
| | Able to connect during testing |
| | Inconsistent connection and/or reduced functionality during testing |
| | Unable to connect during testing |
| | Location has not been tested |

Note: Locations not on the connectivity table have not been tested. Desktop VC may or may not work at other locations. You may attempt to connect at your own risk. As always, we encourage you to ensure that an audio backup is available in case of desktop VC failure.

Users attempting to use desktop videoconferencing can increase their chances of successfully joining a call by using a wired internet connection and closing other applications that may be open on your desktop
